About

Second-year Software Engineering student at Taylor's University with hands-on experience in full-stack web development, database management, and UI/UX design. Proven ability to work under pressure and deliver results in competitive environments, as demonstrated by placing in the top 10 at the university hackathon. Eager to apply technical skills and grow through a software engineering internship.

Education

Bachelor of Software Engineering (Computer Science), *Taylor's University* 2027
Year 2, Final Semester Prior to Internship Expected Graduation: 2027 Subang Jaya, Malaysia

Technical Skills

Frontend Development
HTML, CSS, JavaScript, React

Database
MySQL

AI & Prompt Engineering
Applying modern AI tools and prompt engineering techniques to enhance system efficiency and development workflows

Backend Development
Java, Python, PHP, web application backend systems

UI/UX Design
Figma (wireframing, prototyping)

Software Testing
Testing fundamentals
Defect reporting
system thinking

Languages

English **Bahasa Indonesia** **Bahasa Melayu**

Chinese
Basic

Achievements & Activities

Top 10 Finalist, *Taylor's University Hackathon*
Won Top 10 out of 50 teams at the ImagineHacks by architecting an tourism app selecting react JS, CSS, HTML, UI/UX wireframes, after evaluating data relational needs and scalability constraints.

Relevant Coursework & Projects

Full-Stack Web Application Development
- Designed and developed web applications using HTML/CSS for the frontend and backend technologies for server-side logic
- Integrated MySQL databases to manage and retrieve application data
- Created UI wireframes and prototypes in Figma prior to development to align design with functionality

Database Design & Management

- Designed relational database schemas and wrote SQL queries using MySQL
- Performed database normalization, data modeling, and optimization as part of coursework projects
